## Cover Letter

Application for **Computer Instructor** Position (**Vacancy No. W-HRT-329**)

Dear Hiring Committee,

I am writing to express my strong interest in the Computer Instructor position with WASSA. As a Computer Science student, computer instructor, trainer, and former WASSA Web Development trainee, I am excited about the opportunity to contribute to WASSA's mission of empowering women and youth through education, digital literacy, and technology skills development.

I have more than two years of experience teaching computer-related subjects through both online and private instruction. Currently, I work as an English, Mathematics, and Computer Instructor at Afghan Women Online Academy, where I teach computer fundamentals, Microsoft Office applications, internet and email usage, digital literacy, web development concepts, and practical computer skills. I also provide individualized support to learners and develop lesson plans and instructional materials tailored to different learning levels.

My technical background includes training and practical experience in HTML, CSS, JavaScript, Bootstrap, PHP, MySQL, React, Git, GitHub, and web development project implementation. Through my training with WASSA, I gained valuable hands-on experience in both front-end and back-end web development while strengthening my communication and problem-solving skills.

In addition to my technical expertise, I have extensive experience as a trainer and facilitator. During my work with Equality Peace and Development Organization (EPDO), I conducted training sessions, facilitated group learning activities, maintained participant records, prepared reports, and supported community engagement initiatives. These experiences strengthened my ability to communicate effectively, manage training sessions, monitor participant progress, and create positive learning environments.

I am particularly interested in this position because it combines two areas that I am passionate about: education and technology. I strongly believe that digital skills create opportunities for individuals and communities, especially women and youth. I am committed to helping participants build practical computer skills, confidence, and employability through high-quality training and mentorship.

My fluency in Dari and English, combined with my training experience, technical knowledge, and commitment to community development, would allow me to contribute effectively to the objectives of this program. I would be honored to join WASSA and support its efforts to expand digital literacy and computer education opportunities in Afghanistan.

Thank you for your time and consideration. I look forward to the opportunity to discuss my qualifications further and demonstrate how I can contribute to the success of this project.

Sincerely,

Samira Hakimi
